Rationale

On June 21, 2022, Biocon Limited (rated [ICRA]AA+&/[ICRA]A1+&) had submitted to the stock exchange a statement issued by its subsidiary, Biocon Biologics Limited (BBL/the company) in response to media articles related to bribery allegations. As per these articles, the Central Bureau of Investigation (CBI) has alleged that the Joint Drugs Controller of Central Drugs Standard Control Organisation (CDSCO) has received bribe for waiving the phase III trials of one of its products, Insulin Aspart in India. Further, certain individuals, including an employee of the company have been arrested in connection with the allegation. BBL has denied the allegation stating all its product approvals are backed by clinical data and that the trial waiver was based on existing regulatory guidance. Also, the company has terminated its contract with the consulting company involved in its product approval process. BBL has appointed an external law firm to do a comprehensive review of its current governance processes involving its consultants and vendors. As per the management, the investigation is currently ongoing and BBL is cooperating with the CBI on this matter.

ICRA understands that there is no impact on the company's operations currently or banking channels. ICRA has noted the said developments and the ratings remain unchanged at [ICRA]AA+&/[ICRA]A1+&. ICRA will continue to monitor the developments in this regard and possible impact on the credit risk profile of the company, if any, and take an appropriate rating action as and when required.

About the company

Biocon Limited was initially set up as a joint venture between Biocon Biochemicals Limited of Ireland and Indian entrepreneur Ms. Kiran Mazumdar Shaw in 1978 to manufacture and export enzymes. After Unilever acquired the JV partner and the businesses were restructured, Biocon became an independent entity, and the Indian promoters bought the entire stake in 1998. In 2000, the company commissioned its first fully automated submerged fermentation plant to produce specialty biopharmaceuticals and received USFDA approval for lovastatin in 2001. From being a predominantly fermentation-based APIs and enzymes manufacturer, the company has emerged as an R&D-based biotechnology company having developed its proprietary products and offering research services to global pharmaceutical majors. Biocon, through its subsidiary BBL, recently entered a collaboration with Adagio Therapeutics for a novel Covid antibody therapy and a strategic alliance with SILS for vaccines and infectious diseases antibodies. The alliance with SILS for vaccines enables BBL to generate a committed revenue stream and related margins, commencing H2 FY2023. BBL's proposed acquisition of biosimilar assets of Viatrix Inc. is expected to be concluded by H2 CY2022.
