## Clix Capital Services Private Limited: Rating confirmed as final for PTCs backed by merchant loan receivables issued by ML Basilisk June 2022

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
ML Basilisk June 2022	Series A PTC	50.00	[ICRA]AA(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure-1

### Rationale

In July 2022, ICRA had assigned a Provisional [ICRA]AA(SO) rating to Series A PTC issued by ML Basilisk June 2022 trust. The pass-through certificates (PTCs) are backed by a pool of Rs. 64.75-crore merchant loan receivables (underlying pool principal of Rs. 55.55 crore) originated by Clix Capital Services Private Limited (Clix). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

A summary of the pool's performance after the September 2022 payouts is shown in the table below:

Parameter	ML Basilisk June 2022
Months post securitisation	3
Pool amortisation	46.38%
Series A PTC Amortisation	51.54%
Average monthly prepayment rate %	7.10%
Cumulative collection efficiency	98.41%
Loss cum 0+ dpd	9.48%
Loss cum 30+ dpd	1.28%
Loss cum 90+ dpd	0.01%
Cumulative cash collateral utilisation	0.00%

### Key rating drivers

#### Credit strengths

- Availability of credit enhancement in the form of overcollateralisation, EIS and cash collateral
- Around 89% contracts in the pool have bureau score of 700 and above at the time of onboarding

#### Credit challenges

- High delinquencies seen in the portfolio in the past; limited vintages, post underwriting revision, undertaken after Covid-19 pandemic
- Pool performance will remain exposed to any fresh disruptions caused by the Covid-19 pandemic.

### Description of key rating drivers highlighted above

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payments to Series A PTC at the predetermined interest rate on the principal outstanding. The principal repayment to Series A PTC is promised on the last

payout date. During the tenure of Series A PTC, the collections from the pool, after making the promised interest payouts to Series A PTC, will be used to make the expected principal payouts to Series A PTC, though this principal payouts is not promised and any shortfall in making the expected principal payment to Series A PTC would be carried forward to the subsequent payouts. Also, in the event of a shortfall in meeting the promised PTC payouts during any month, the Trustee will utilise the CC to meet the shortfall. Further, in the event of excess collections in a month – after meeting the promised PTC payouts – such excess would first be used to top up the CC to the extent of past utilisation.

The first line of support for Series A PTC in the transaction is in the form of over-collateralisation of 10.0% of the pool principal. Additionally, the EIS (13.08% of initial pool principal) available in the structure and a CC of 10.0% of the initial pool principal (i.e. Rs. 5.56 crore) provided by Clix acts as further CE in the transaction. Moreover, all dues against the 90+ days past due (dpd) contracts in the pool shall be set off from the pool's collections/cash lying in the trust account/loss reserve being maintained by Clix under the risk sharing arrangement with its digital wallet/fintech partner (Partner) on a quarterly basis.

The current pool consists of receivables from Clix's merchant loans under its lending programme with the Partner. There were no overdues in the pool as on the cut-off date. The pool has a low obligor concentration with the top 10 borrowers having a share of 0.8%. The contracts in the pool had a weighted average seasoning of ~4 months and pre-securitisation amortisation of 24%. The company had reported high delinquencies for this asset class during the early stages of the product, though there was an improvement in the second half of the previous fiscal under the tighter lending regime. The asset quality, however, remains moderate while the portfolio seasoning remains limited. Also, the performance of the pool would remain exposed to any fresh disruptions caused by the pandemic.

**Past rated pools:** ICRA has ratings outstanding on eight PTC transactions of Clix's merchant loan portfolio. One of these pools has a replenishment structure with the pool amortisation yet to commence. The performance of the remaining pools (which have completed atleast two payouts) has been satisfactory with a cumulative collection efficiency of more than 97% with nil CC utilisation and nil 180+ days past due (dpd).

## Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The mean and the coefficient of variation (CoV) are calibrated on the basis of the values observed in the analysis of the past performance of Clix's merchant loan portfolio. ICRA has also factored in Clix's credit quality experience and ICRA's expectation of the credit quality of the merchant loan portfolio. Overall, Clix's merchant loan target borrower segment could be financially vulnerable as well as subject to various seasonality factors.

The resulting collections from the pool – after incorporating the impact of losses and prepayments – are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction. Various possible scenarios are simulated, and the incidences of default to the investor as well as the extent of losses are measured. These are then compared with ICRA's internal benchmarks for the target rating.

For the transaction, after adjusting for key features like ticket size, bureau score, original tenure, seasoning and risk decile separately in the pool, ICRA estimates the shortfall in the pool principal collection within the pool's tenure at 6.5-7.5%, with certain variability around it. The prepayment rate for the underlying pool is estimated at 3.0-4.5% per annum.

## Liquidity position: Strong

As per the transaction structure, only the interest amount is promised to the Series A PTC holders on a monthly basis while the principal amount is promised on the scheduled maturity date of the transaction. The cash flows from the pool and the CE are expected to be comfortable to meet the payouts to the Series A PTC investors.

## Rating sensitivities

**Positive factors** – The rating could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to build-up of the CE cover for the remaining payouts.

**Negative factors** – Pressure on the rating could emerge on the sustained weak collection performance (monthly collection efficiency <90%) of the underlying pool, leading to higher-than-expected delinquency levels and CE utilisation levels.

## Analytical approach

The rating action is based on the Trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

## About the company

Clix Capital Services Private Limited (Clix) is a non-banking financial company (NBFC) registered with the Reserve Bank of India (RBI). It provides retail financing products (personal loans, business loans, micro, small and medium enterprise (MSME), housing finance, etc). The company, which was incorporated as GE Money Financial Services Pvt Ltd (GE Money) in 1994, formed the non-banking business of the General Electric (GE) Group along with its Group company – GE Capital Services India (GE Capital). In September 2016, this business was acquired by a consortium, comprising AION Capital Partners, Mr. Pramod Bhasin and Mr. Anil Chawla, and rebranded as Clix<sup>1</sup>. In April 2022, Clix Finance India Private Limited (CFIPL; erstwhile GE Capital) was merged with Clix. Following the merger, Clix's portfolio comprises MSME and consumer lending along with healthcare and equipment finance and digital lending (onboarded from CFIPL). Additionally, Clix Housing Finance Private Limited, a wholly-owned subsidiary of Clix, primarily provides housing/mortgage finance products.

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A PTC	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [www.icra.in](http://www.icra.in)
