## Cars24 Financial Services Private Limited: Provisional ratings assigned to SNs backed by used car loan receivables issued by Camaro 12 22

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Camaro 12 22	Series A1 SN	38.13	Provisional [ICRA]A(SO); Assigned
	Series A2 SN	2.27	Provisional [ICRA]BBB(SO); Assigned

\*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
----------------------------------------------------	------------------------------------------------------------------

### Rationale

ICRA has assigned provisional ratings to the securitisation notes (SNs) issued under a securitisation transaction originated by Cars24 Financial Services Private Limited (CFSPL). The SNs are backed by a pool of Rs. 55.56-crore used car loan receivables (underlying pool principal of Rs. 41.22 crore).

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts, the credit enhancement (CE) available in the form of (i) a cash collateral (CC) of 6.50% of the pool principal to be provided by CFSPL, (ii) subordination/over-collateralisation of 7.50% of the pool principal for Series A1 SN and 2.00% of the pool principal for Series A2 SN, (iii) subordination of the entire excess interest spread (EIS) of 13.43% of the initial pool principal in the structure, and the integrity of the legal structure. The ratings are subject to the fulfilment of all the conditions under the structure and the review of the documentation pertaining to the transaction by ICRA.

### Key rating drivers

#### Credit strengths

#### Credit challenges

- High geographical concentration with top 3 states (Maharashtra, Karnataka and Delhi) accounting for ~57% share in the initial pool
- Limited vintage of business; peaking of delinquencies is yet to happen across vintages as majority of the portfolio has not completed a cycle
- The pool's performance will remain exposed to macroeconomic shocks/ business disruptions if any

### Description of key rating drivers highlighted above

As per the transaction structure, Series A2 SN is subordinate to Series A1 SN. During the tenure of Series A1 SN, the collections from the pool will be used to make the promised interest and principal (to the extent of 92.5% principal billed) payouts to Series A1 SN. Post the maturity of Series A1 SN, payouts to Series A2 SN (principal payouts to Series A2 SN investors) will be on expected basis, which will be due and payable only on the final maturity date. The final maturity date for both tranches of PTCs is May 24, 2027.

The first line of support for Series A1 SN in the transaction is in the form of a subordination/over-collateralisation of 7.50% of the pool principal (includes the principal payable to Series A2 SN). After Series A1 SN has been fully paid, over-collateralisation of 2.00% of the pool principal would be available for Series A2 SN.

Further credit support is available in the form of an EIS of 13.43% of the initial pool principal. A CC of 6.50% of the initial pool principal (Rs. 2.68 crore), to be provided by CFSPL, would act as further CE in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the trustee will utilise the CC to meet the shortfall.

There are no overdues in the pool as on the cut-off date. The weighted average seasoning of the pool is moderate at ~8 months as on the pool cut-off date. The pool has high geographical concentration with the top 3 states (Maharashtra, Karnataka and Delhi) contributing ~57% to the initial pool principal amount. The performance of the pool would remain exposed to any macroeconomic shocks or business disruptions.

**Past rated pools:** ICRA has ratings outstanding on 10 PTC transactions of CFSPL. The performance of all the pools, which have completed at least three payouts till November 2022, has been satisfactory with a cumulative collection efficiency of more than 98% with nil CC utilisation.

### Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after taking into account the past performance of the originator's portfolio and rated pools as well as the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 4.25-5.25%, with certain variability around it. The prepayment rate for the underlying pool is estimated at 4.8%-18.0% (with a mean of 12.0%) per annum.

### Liquidity position

#### Strong for Series A1 SN

The cash collections and the credit collateral available in the transaction are expected to be comfortable to meet the Series A1 SN investor payouts. Assuming a monthly collection efficiency of even 50% in the underlying pool of contracts in a stress scenario, the recommended credit collateral would cover the shortfalls in the securities payouts for a period of six months.

#### Adequate for Series A2 SN

After Series A1 SN is fully paid, the entire principal amount is promised on the scheduled maturity date of the transaction. The cash flows from the pool and the available CE are expected to be adequate to meet the promised payouts to the Series A2 SN investors.

### Rating sensitivities

**Positive factors** – The ratings could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the CE cover for the remaining payouts.

**Negative factors** – Pressure on the ratings could emerge on the sustained weak collection performance of the underlying pool (monthly collection efficiency <90%) leading to higher-than-expected delinquency levels and CE utilisation levels.

## Analytical approach

The rating action is based on the analysis of the performance of CFSPL's digital retail lending (DRL) portfolio till September 2022, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the CE cover available in the transaction.

Analytical Approach	Comments
Applicable rating methodologies	<a href="#">Rating Methodology for Securitisation Transactions</a>
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned ratings are provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant's Know Your Customer (KYC) certificate
6. Any other documents executed for the transaction

## Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional ratings would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the ratings, the provisional ratings will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the company

Incorporated in September 2018, CFSPL is registered with the Reserve of India (RBI) as a non-banking financial company (NBFC). It is a wholly-owned subsidiary of Cars24 Services Private Limited (CSPL). The company's lending operations are classified into two segments: digital business lending (DBL) and digital retail lending (DRL).

DBL represents loans extended to used car dealers empanelled with CSPL. This is primarily a revolving line of credit extended to used car dealers. At present, CFSPL caters to ~1,400 used car dealers empanelled with CSPL. The DBL product is further classified into Unnati regular and Unnati plus. Under the DRL segment, CFSPL provides loans to retail customers primarily for purchasing used cars. CFSPL serves as the captive financing unit of its parent (CSPL) and extends funding to customers purchasing used cars through CSPL's online platform.

## Key financial indicators

CFSPL	FY2021	FY2022	H1 FY2023*

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1 SN	Moderately Complex
Series A2 SN	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
