Five-Star Business Finance Limited: Provisional rating assigned to PTCs backed by small business loan receivables issued by Indigo 022

Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Indigo 022	Series A1 PTC	72.00	Provisional [ICRA]AA(SO); Assigned

*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

Rationale

ICRA has assigned a provisional rating to Series A1 PTC under a securitisation transaction originated by Five-Star Business Finance Limited {FSBFL/originator; rated [ICRA]A+ (Stable)}. The pass-through certificates (PTCs) are backed by a pool of Rs. 80.00-crore (principal amount; receivables of Rs. 135.17 crore) small business loan receivables originated by FSBFL.

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, the credit enhancement (CE) available in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal to be provided by the originator, (ii) over-collateralisation of 10.00% of the initial pool principal for Series A1 PTC, and (iii) the excess interest spread (EIS) of 47.63% of the initial pool principal for Series A1 PTC in the structure, as well as the integrity of the legal structure. The rating is subject to the fulfilment of all the conditions under the structure and the review of the documentation pertaining to the transaction by ICRA.

Key rating drivers

Credit strengths

- Availability of CE in the form of EIS, principal subordination and CC
- No overdue contracts as on the cut-off date
- Average seasoning of ~21 months and average pre-securitisation amortisation of ~18% as on the cut-off date

Credit challenges

- High geographical concentration with top 3 states contributing around 92% of the pool principal as on the cut-off date
- Exposure to interest rate risk given that the pool has contracts with fixed rate, while yield on securities is floating
- Performance of the pool would remain exposed to macro-economic shocks/business disruptions/natural calamities that may impact the income-generating capability of the borrower

Description of key rating drivers highlighted above

According to the transaction structure, the loan pool receivables are assigned at par to the PTC investors. During the tenure of Series A1 PTC, the collections from the pool, after making the promised interest payouts to Series A1 PTC, will be used to make the expected principal payouts to Series A1 PTC. The principal payout is not promised and any shortfall in making the expected principal payment to Series A1 PTC would be carried forward to the subsequent payout. The surplus EIS available after meeting the promised and expected payouts to the PTCs will be passed on to the originator every month.

The first line of support for Series A1 PTC in the transaction is in the form of principal subordination of 10.0% of the initial pool principal. Further credit support is available in the form of an EIS of 47.6% of the initial pool principal. A CC of 5.0% of the initial

pool principal (Rs. 4.00 crore), provided by FSBFL, acts as further CE in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the Trustee will utilise the CC (in case the principal subordination and EIS are insufficient) to meet the shortfall.

There are no overdues in the pool as on the cut-off date. The weighted average seasoning of the pool is 20.9 months¹ with pre-securitisation amortisation of 17.7% as on the cut-off date. The pool has high geographical concentration with the top 3 states (Tamil Nadu, Andhra Pradesh and Telangana) contributing 92.3% to the initial pool principal amount. At the district level, the top district accounted for 4.8% of the initial pool principal amount while the top 10 districts accounted for 30.4%. The performance of the pool would remain exposed to macro-economic shocks/business disruptions/natural calamities that may impact the income-generating capability of the borrower.

Past rated pool performance: ICRA has rated 12 securitisation transactions with the underlying receivables originated by FSBFL. All transactions, which have completed at least one payout, have reported a cumulative collection efficiency of more than 97% and loss-cum-90+ days past due (dpd) of sub-1.0% as of the November 2022 payout month with no CC utilisation.

Key rating assumptions

ICRA's cash flow modelling for rating asset-backed security (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the balance tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after taking into account the past performance of the originator's portfolio and the rated pools as well as the performance and characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 4.0-5.0%, with certain variability around it. The average prepayment rate for the underlying pool is estimated at 18.0% per annum.

Liquidity position: Strong

As per the transaction structure, only the interest amount is promised to the PTC holders on a monthly basis while the principal amount is promised on the scheduled maturity date of the transaction. The collections from the pool and the available CE are expected to be comfortable to meet the promised payouts to the PTC investors.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the CE would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher CE utilisation levels, would result in a rating downgrade.

¹ Basis number of instalments as shared by originator

Analytical approach

The rating action is based on the analysis of the performance of FSBFL's portfolio till September 2022, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the CE cover available in the transaction.

Analytical Approach	Comments
Applicable rating methodologies	Rating Methodology for Securitisation Transactions
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant's know your customer (KYC) certificate
6. Any other documents executed for the transaction

Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at www.icra.in.

About the company

Five-Star Business Finance Limited (FSBFL) is a Chennai-headquartered non-banking financial company (NBFC) extending secured loans to micro entrepreneurs and self-employed individuals, predominantly in semi-urban markets. The company commenced operations in 1984, with a focus on consumer loans and vehicle finance. In 2005, it shifted its focus to small business loans with typical loan tickets of Rs. 1-10 lakh and an average ticket size of Rs. 3.5 lakh. The loans are predominantly backed by self-occupied residential properties. FSBFL had 352 branches as of September 30, 2022.

The six institutional investors (Matrix Partners, TPG Asia, Norwest Venture Partners, Sequoia Capital, Sirius II Pte. Ltd (KKR), and TVS Shriram Growth Fund) held a stake of 69.3% in the company as of September 30, 2022, with the promoters holding 17.5% (fully diluted).

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1 PTC	Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

Corrigendum:

Document dated December 30, 2022 has been corrected with revisions as detailed below:

- Sections where revision has been made:
 - Credit challenges on Page 1
 - Complexity indicator of the rated instrument on Page 5
- Revision made:
 - Credit challenge for exposure on interest rate risk is added
 - Complexity indicator is rectified from 'Moderately Complex' to 'Complex'
