## Sundaram Finance Limited: Provisional [ICRA]AAA(SO) assigned to PTCs backed by pool of commercial vehicle, tractor and farm equipment loan receivables issued by Shri Trust AN 2023

### Summary of rating action

Trust Name	Instrument Type*	Rated Amount (Rs. crore)	Rating Action
Shri Trust AN 2023	PTC Series A	395.64	Provisional [ICRA]AAA(SO); Assigned

\*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
----------------------------------------------------	------------------------------------------------------------------

### Rationale

ICRA has assigned a provisional rating to the pass-through certificates (PTC) Series A issued under a securitisation transaction originated by Sundaram Finance Limited (SFL/originator; rated [ICRA]AAA (Stable)/A1+). The PTCs are backed by loan receivables of Rs. 395.64 crore (pool principal; receivables of Rs. 463.83 crore) of new commercial vehicle (CV), used CV, tractor and farm equipment loan contracts.

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, SFL's track record as well as the credit enhancement (CE) available in the form of (i) a cash collateral (CC) of 6.5% of the pool principal to be provided by the originator and (ii) the entire excess interest spread (EIS) of 5.9% in the structure. The rating is also based on the integrity of the legal structure. The rating is subject to the fulfilment of all the conditions under the structure and the review of the documentation pertaining to the transaction by ICRA.

### Key rating drivers

#### Credit strengths

- Presence in diverse segments with established track record in lending and financial services business
- Availability of CE in the form of EIS and CC
- Average seasoning of ~11 months as on the pool cut-off date
- No overdue contracts in the pool as on the cut-off date

#### Credit challenges

- Performance of the pool would remain exposed to macro-economic shocks/business disruptions

#### Description of key rating drivers highlighted above

As per the transaction structure, the monthly cash flow schedule will comprise the promised interest payments to PTC Series A at the predetermined interest rate on the principal outstanding and the entire principal on the final maturity date (June 25, 2027). During the tenure of PTC Series A, the collections from the pool, after making the promised interest payouts to PTC Series A, will be used to make the expected principal payouts to PTC Series A. However, this principal payout is not promised and any shortfall in making the expected principal payment to PTC Series A would be carried forward to the subsequent payout.

The loan pool receivables will be assigned at par to the PTC investors. The first line of support for meeting any shortfall in the scheduled PTC payouts is available in the form of a scheduled EIS of 5.9% in the structure. Further credit support is available in the form of a CC of 6.5% of the initial pool principal to be provided by SFL in the transaction. The CC will be in the form of a

fixed deposit maintained with a bank. In the event of a shortfall in meeting the promised PTC payouts during any month, the trustee will utilise the CC to meet the shortfall.

The selected pool consists of receivables against loans given for financing new CVs (55.0% share in the pool by value), used CVs (7.5%), tractors (37.0%) and farm equipment (0.5%). The pool has an average seasoning of ~11 months as on the cut-off date. There are no overdue contracts in the pool as on the cut-off date. A high share of the contracts (99%) has never been delinquent in the past. The performance of the pool would remain exposed to macro-economic shocks/business disruptions.

**Performance of past rated pools:** ICRA has rated 55 securitisation transactions with the underlying receivables originated by SFL, of which seven pools are live at present. The performance of the six live pools (with at least 3 months payout) has been healthy with a cumulative collection efficiency of >97% and no CC utilisation as of the September 2022 collection month.

### Key rating assumptions

ICRA’s cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the balance tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after taking into account the past performance of the originator’s portfolio and the rated pools as well as the performance and characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 2.25-3.25%, with certain variability around it. The prepayment rate for the underlying pool is estimated in the range of 4.8-18.0% per annum with average prepayment of 12.0%.

### Liquidity position: Superior

As per the transaction structure, only the interest amount is promised to the PTC holders on a monthly basis while the principal amount is promised on the scheduled maturity date of the transaction. This structure imparts significant liquidity to the transaction as even a small amount of collections in the underlying pool of contracts would be sufficient to meet the promised monthly PTC payouts. The cash flows from the pool and the available CE are expected to be very comfortable for meeting the promised payouts to the PTC investors.

### Rating sensitivities

**Positive factors** – Not applicable

**Negative factors** – Pressure on the rating could emerge on the sustained weak collection performance of the underlying pool (monthly collection efficiency of <90%), leading to higher-than-expected delinquency levels and CE utilisation levels.

### Analytical approach

The rating action is based on the analysis of the performance of SFL’s portfolio till September 2022, the key characteristics and composition of the current pool, the performance expected over the balance tenor of the pool, and the CE cover available in the transaction.

Analytical Approach	
Applicable rating methodologies	<a href="#">Rating Methodology for Securitisation Transactions</a>
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Any other documents executed for the transaction

## Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the company

SFL is the flagship company of the T. S. Santhanam arm of the TVS Group. It is one of the large non-banking financial companies (NBFCs) in the country with assets under management (AUM) of Rs. 29,532 crore as of March 2022. Its primary focus is on the financing of CVs and cars. SFL has invested in various entities to provide a gamut of financial services like housing finance (Sundaram Home Finance Limited), insurance (Royal Sundaram) and mutual funds (Sundaram Asset Management Company Limited).

SFL reported a standalone net profit of Rs. 809 crore in FY2021 on a managed asset base of Rs. 35,752 crore compared with a net profit of Rs. 724 crore {including Rs. 53 crore towards profit on sale of shares in Sundaram Finance Holdings Limited (net of tax)} on a managed asset base of Rs. 34,804 crore in FY2020. It reported a net profit of Rs. 903 crore in FY2022 on a managed asset base of Rs. 35,627 crore.

## Key financial indicators (audited)

SFL – Standalone	FY2021	FY2022	H1 FY2023
Profit after tax	809	903	529

### Complexity level of the rated instrument

Instrument	Complexity Indicator
PTC Series A	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
