<b>Total</b>	<b>4,728.12</b>	<b>4,585.66</b>	

\*Instrument details are provided in Annexure I

### Rationale

The revision in the outlook factors in the pickup in business volumes following the resolution of the operational issues faced by Spandana Sphoorty Financial Limited (SSFL). In FY2022, the non-availability of operational data due to the loss of information technology (IT) assets had impacted the collection process, which had affected the company's overall performance as well as growth. However, post the recovery of data and the onboarding of a new management team, SSFL's operations and performance improved. Further, it has a comfortable capitalisation profile, supported by timely capital infusions by existing investors. SSFL reported assets under management (AUM) of Rs. 6,637 crore (standalone; more than 20.9 lakh borrowers; including of book of Rs. 336 crore) as on December 31, 2022, managed via 1,041 branches spread across 18 states in India. The established branch network is expected to support the company's future growth while improving its operational efficiency. SSFL envisages to reach an AUM of Rs. 15,000 crore by FY2025.

The ratings also factor in the improvement in SSFL's asset quality and profitability metrics in Q2 and Q3 FY2023. The company undertook substantial write-offs from the pre-March 2021 stressed book in Q1 FY2023. Post Q1 FY2023, the share of the vintage book (pre-March 2021) has declined gradually due to the rundown and write-offs as well as the pick-up in disbursements. Further, the new book has displayed good collection efficiency, which helped the company improve its reported gross stage 3 (GS3) to 5.3% as on December 31, 2022 (90+ days past due (dpd) for the overall managed portfolio, including direct assignment, was 9.8%) from 14.2% in March 2022.

The ratings, however, factor in SSFL's weak profitability profile (despite improving in recent quarters) as it reported a net loss of Rs. 104 crore in 9M FY2023. The profitability was impacted by higher credit costs (including write-offs) and operating expenses. As the company plans to expand its employee base and branch network over the next few quarters, it would be critical to maintain optimal operating efficiency. Nonetheless, SSFL has increased its yield on disbursements from Q1 FY2023, which is expected to improve its lending spread and hence the net interest margin (NIM), going forward. Further, ICRA expects incremental credit costs to remain low. With the expected improvement in the NIM, the overall profitability is expected to increase. This will remain a key monitorable.

The ratings also consider the risks associated with the marginal borrower profile, unsecured lending, business and political risks along with the high pace of growth. SSFL's ability to manage such risks while expanding to new geographies would be

crucial. Additionally, in line with the industry, the company's ability to onboard borrowers with a good credit history and recruit and retain employees would be a key monitorable.

ICRA has reaffirmed with revision in outlook to positive from stable and simultaneously withdrawn its rating of [ICRA]A- (Positive) for the Rs. 61.46 crore non-convertible debenture (NCD) programme and PP-MLD [ICRA]A- (Positive) for the Rs. 81.00 crore market linked debentures (MLD) programmes of the company as the instruments have matured and have been fully repaid. This is in line with ICRA's policy on the withdrawal of credit ratings.

## Key rating drivers and their description

### Credit strengths

**Business growth revives with operational issues being addressed** – SSFL has resolved the operational and other issues which had cropped up following the exit of the erstwhile Managing Director (MD). The company has undertaken sizeable write-offs to clear the portfolio quality issues faced since H2 FY2022. It has strengthened its organisation structure, streamlined its systems and processes, and hired 13 personnel at the top and second-in-line management levels to reduce its exposure to key person risks, going forward. The new management has articulated their growth target of reaching AUM of Rs. 15,000 crore by FY2025. Backed by a planned disbursement of Rs. 8,000 crore in FY2023, SSFL is expected to reach an AUM of about Rs. 9,000 crore by March 2023.

SSFL's portfolio remains fairly diversified with no state accounting for more than 20% of the portfolio. The concentration of the top 3 states in the company's standalone portfolio was 43.3% as on December 31, 2022 (48% as on March 30, 2022, 50% as on March 31, 2021 and 48% as on March 31, 2020). As on December 31, 2022, its largest state, Madhya Pradesh, accounted for 16.9% of the standalone portfolio, followed by Odisha (15.3%), Andhra Pradesh (11.1%) and Karnataka (11.0%). ICRA notes that disbursements in H1 FY2023 were relatively moderate as the company was still in a transition phase and was streamlining its operations. However, the same picked up significantly in Q3 FY2023 with the momentum expected to continue.

**Comfortable capitalisation profile** – SSFL's capital adequacy ratio remains well above the regulatory requirement of 15% and the leverage has been comfortable, supported by regular equity infusions and good internal capital generation in the past. SSFL's standalone managed gearing stood at 1.9x as on December 31, 2022 (1.4x as on March 31, 2022 and 2.2x as on March 31, 2021). On a consolidated basis as well, the managed gearing was comfortable at 1.8x as of December 2022 vis-à-vis 1.4x as of March 2022 and 2.3x as of March 2021. SSFL's capitalisation profile provides it with a comfortable runway for scaling up its operations over the medium term. Going forward, given the strong growth plans envisaged by the management, the gearing is expected to increase with incremental business being funded through fresh borrowings. ICRA expects SSFL to maintain its standalone managed gearing below 4x over the next two years despite the management's significant growth plans.

### Credit challenges

**Controlling incremental slippages amid strong growth crucial; legacy stress largely addressed** – In Q1 FY2023, the company undertook a substantial write-off of Rs. 702 crore (11.3% of standalone AUM before write-off) of stressed assets, originated pre-March 2021 with limited recovery prospects. Due to significant credit costs, SSFL reported a standalone net loss of Rs. 103.9 crore (consolidated net loss of Rs. 93.2 crore), translating into a return on managed assets (RoMA) of -1.7% and a return on average net worth (RoNW) of -4.7%. Credit and provision costs stood at 6.1% in 9M FY2023 compared to 4.8% in FY2022 and 6.9% in FY2021. As of December 2022, the pre-March 2021 book accounted for 7.7% and the restructured book stood at 2.5% of the AUM. Given the strong growth plans laid down by the management, it is crucial for the company to manage the risk profile of its new disbursements and control incremental slippages from its existing portfolio, which would be crucial for stabilising its asset quality performance in the near term.

**Ability to strengthen funding profile critical** – ICRA notes that SSFL has increased its dependence on capital market instruments, in the recent past, via the issuance of non-convertible debentures (NCDs) and market linked debentures (MLDs).

Since the disruption in operations due to board-level issues, the share of funding through capital market instruments increased to 39.0% as of December 2022 from 33.8% as of March 2022 and 24.1% as of September 2021 while the share of funding through bank borrowings declined to 41.0% as of December 31, 2022 from 45.7% as of March 2022 and 54.2% as of September 2021. Going forward, it is critical for SSFL to strengthen its funding profile in order to make disbursements as planned and achieve an AUM of Rs. 15,000 crore by FY2025, while maintaining an adequate liquidity profile.

**Risks associated with microfinance business** – Microfinance is susceptible to the risks associated with unsecured lending to marginal borrowers with limited ability to absorb income shocks and the rising borrower leverage levels owing to an increase in multiple sources of finance in SSFL’s areas of operations. Further, political, and operational risks associated with microfinance may result in high volatility in the asset quality indicators. The microfinance industry is prone to socio-political, climatic, and operational risks, which could negatively impact SSFL’s operations. Additionally, in line with the industry, the company’s ability to onboard borrowers with a good credit history and recruit and retain employees would be a key monitorable. Nevertheless, ICRA notes that the revised guidelines for the microfinance industry are expected to provide the players, including SSFL, with better pricing ability in view of the underlying risks.

### Environment and Social Risks

Given the service-oriented business of SSFL, its direct exposure to environmental risks as well as those emanating from regulations or policy changes is not material. While lending institutions can be exposed to environmental risks indirectly through their portfolio of assets, SSFL’s exposure to environmentally sensitive segments remains moderate. This is on account of borrower profile who get impacted by climate change. Hence, moderate indirect transition risks arise from changes in regulations or policies concerning the underlying assets.

With regards to social risks, data security and customer privacy are among the key sources of vulnerability for lending institutions as any material lapses could be detrimental to their reputation and could invite regulatory censure. In FY2022, SSFL had faced such a lapse, whereby it lost access to its old systems and servers following a dispute with its erstwhile Promoter and IT vendor, resulting in significant operational constraints. However, subsequently, SSFL was able to retrieve the old systems and servers with all the legacy systems intact following the resolution of the dispute. Going forward, it would be critical for the company to establish failsafe policies & processes to mitigate the occurrence of such instances.

### Liquidity position: Adequate

The company’s unencumbered cash and liquid investment balance stood at Rs. 1,023.2 crore as on December 31, 2022. SSFL’s total debt obligation over the next three months (January 2023 - March 2023) is Rs. 879.9 crore. The on-book liquidity is sufficient to cover approximately three months of debt repayment obligations. The monthly average collection over the next few months is expected to be about Rs. 500 crore, providing a positive asset-liability mismatch. In addition to this, the company is expecting fresh sanctions from financial institutions (FIs) and banks, which are in various stages of approval. Overall, SSFL’s liquidity profile is adequate considering the expected collections, funding in the pipeline and the on-balance sheet (on-b/s) liquidity maintained by it.

### Rating sensitivities

**Positive factors** – ICRA could upgrade the ratings if there is an improvement in SSFL’s asset quality and profitability indicators with a RoMA of more than 2.5% while demonstrating a steady improvement in its scale of operations.

**Negative factors** – Pressure on the ratings could arise if the company witnesses further deterioration in its asset quality, which could affect its profitability. Weakening of the capitalisation profile with a managed gearing of more than 6x or a stretched liquidity position could also exert pressure on the ratings.

## About the company

Spandana Sphoorty Financial Limited (SSFL) was incorporated in 2003 as a non-banking financial company (NBFC) and it took over the microfinance operations of Spandana, a non-governmental organisation started by Ms. Padmaja Reddy in 1998. The company was classified as an NBFC-microfinance institution (NBFC-MFI) in 2015. Following the microfinance crisis in Andhra Pradesh (AP), the company entered into a master restructuring agreement (MRA) as a part of the corporate debt restructuring (CDR) with its lenders in September 2011. It exited the CDR in April 2017 after a fresh equity investment led by Kedaara Capital Investment Managers Limited (Kedaara Capital) and fresh funding from three banks. SSFL completed its initial public offering (IPO) in August 2019. Following Ms. Padmaja Reddy's exit from her executive position in the company in November 2022, a new leadership team has taken over the management of the company.

### Complexity level of the rated instruments

Instrument	Complexity Indicator
Long-term fund based – Term loan	Simple
Non-convertible debentures	Simple
Market linked debentures	Moderately complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

## ABOUT ICRA LIMITED

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website [www.icra.in](http://www.icra.in) or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
