## Piramal Capital & Housing Finance Limited (erstwhile Dewan Housing Finance Corporation Limited): Rating confirmed as final for SNs issued under home loan receivables securitisation transaction

### Summary of rating action

Trust Name	Instrument*	Rated Amount (Rs. crore)	Rating Action
Nirvana Trust March 2023	Series A SN	254.13	[ICRA]AAA(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure I

### Rationale

In March 2023, ICRA had assigned a Provisional [ICRA]AAA(SO) rating to Series A SN issued by Piramal Capital & Housing Finance Limited {PCHFL; rated [ICRA]AA(Stable)}. The securities are backed by a pool of Rs. 628.70-crore home loan (HL) receivables (underlying pool principal of Rs. 254.13 crore). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

A summary of the pool's performance after the May 2023 collection month (June 2023 payouts) is shown in the table below.

Parameter	Nirvana Trust March 2023
Months post securitisation	3
Pool amortisation	6.81%
Series A SN amortisation	6.81%
Cumulative collection efficiency	99.53%
Cumulative prepayment rate	6.28%
Loss-cum-0+ dpd	1.85%
Loss-cum-30+ dpd	0.46%
Loss-cum-90+ dpd	0.00%
Cumulative cash collateral utilisation	0.00%

### Key rating drivers

#### Credit strengths

- Availability of credit enhancement (CE) in the form of excess interest spread (EIS) and cash collateral (CC)
- No overdue contracts in the pool as on the cut-off date and no contracts have been delinquent in the last 12 months
- High share of contracts in the initial pool with a CIBIL score equal to or more than 750 (~57%)

#### Credit challenges

- High geographical concentration with share of top 3 states at ~63% in the initial pool
- Yield for SNs is linked to an external benchmark while interest rate on the underlying loans is floating, leading to basis risk in the structure
- Performance of the pool would remain exposed to macro-economic shocks/business disruptions, if any

## Description of key rating drivers highlighted above

The first line of support for Series A SN in the transaction is in the form of an EIS of 35.57% of the initial pool principal. The EIS available after meeting the promised payouts to Series A SN will flow back to the originator. A CC of 11.00% of the initial pool principal (Rs. 27.95 crore), to be provided by PCHFL, would act as further CE in the transaction. In the event of a shortfall in meeting the promised mortgage-backed securitisation (MBS) payouts during any month, the trustee will utilise the CC to meet the same.

As per the transaction structure, the monthly promised cash flows for Series A SN will comprise the payment of the scheduled Series A SN principal and the interest payment to the subscribers of Series A SN at the predetermined interest rate on the principal outstanding. The residual EIS (after meeting the scheduled SN payout and top-up of CC, if any, in any month) would flow back to the originator.

The pool consists of 1,411 HL contracts with future receivables of Rs. 628.70 crore (underlying principal of Rs. 254.13 crore). The weighted average seasoning of the pool remains high at ~14 months as on the pool cut-off date (February 28, 2023). The adequate borrower profile, with a substantial share of the loan contracts (~57%) having a CIBIL score of more than 750, provides comfort. However, the pool has high geographical concentration with the top 3 states (Maharashtra, Telangana and Delhi) contributing ~63% to the initial pool principal amount. Moreover, it has contracts with a floating rate while the Securitisation Notes (SN) yield is linked to an external benchmark while interest rate on the underlying loans is floating. Hence, the transaction is exposed to basis risk and any downward movement in the benchmark yield will reduce the EIS available in the transaction. Also, the pool's performance would remain exposed to macro-economic shocks/business disruptions.

**Past rated pools:** ICRA has rated three transactions of PCHFL, backed by home loan receivables. The performance of the live pools has been strong with a cumulative collection efficiency of more than 99% and nil CC utilisation as of the June 2023 payout month.

## Key rating assumptions

ICRA's cash flow modelling for rating mortgage-backed securitisation (MBS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after considering the past performance of the originator's portfolio and the rated pools as well as the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 4.00-5.00%, with certain variability around it. The prepayment rate for the underlying pool is estimated at 6.0-20.0% per annum.

## Liquidity position: Superior

The pool collections and the cash collateral available in the transaction are expected to be highly comfortable to meet the Series A SN investor payouts. Assuming a monthly collection efficiency of even 50% in the underlying pool contracts in a stress scenario, the credit collateral would cover the shortfalls in the securities payouts for a period of 32 months.

## Rating sensitivities

**Positive factors** – Not applicable.

**Negative factors** – Any sustained weak collection performance of the underlying pool (monthly collection efficiency <90%) leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, could result in a rating downgrade.

## Analytical approach

The rating action is based on the Trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

## About the originator

Piramal Capital & Housing Finance Limited (PCHFL), a wholly owned subsidiary of Piramal Enterprises Limited (PEL), is registered as a housing finance company with National Housing Bank (NHB) and is engaged in various financial services businesses. It provides both wholesale and retail funding opportunities across industries. PCHFL was incorporated in February 2017. It was formed as a 100% subsidiary of Piramal Finance Ltd (PFL), which was a wholly owned subsidiary of PEL. Until 2016, the financing portfolio was booked at PEL with limited operations at PFL. In FY2017, following a business restructuring, Rs. 13,706 crore of assets and Rs. 12,575 crore of liabilities were transferred to PFL from PEL.

In August 2017, PCHFL received a certificate for commencement for the housing finance business from NHB. Subsequently, PEL's board approved a scheme of amalgamation of PFL and Piramal Capital Ltd (PCL) into PCHFL. PCL was a subsidiary of PEL and had limited operations. The merger process was completed in July 2018 with effect from March 31, 2018. Post the merger, PCHFL became a wholly owned subsidiary of PEL.

Further, as per the resolution plan approved by the National Company Law Tribunal (NCLT), the existing liabilities of Dewan Housing Finance Corporation Limited (DHFL) were discharged by the erstwhile PCHFL and a consideration of Rs. 34,250 crore (comprising upfront cash of Rs. 14,700 crore and issuance of debt instruments of Rs. 19,550 crore) was paid to DHFL's creditors. The erstwhile PCHFL was reverse merged with DHFL with effect from September 30, 2021, and the amalgamated entity (DHFL) was renamed Piramal Capital & Housing Finance Limited.

In 2022, the Group underwent restructuring with the pharma business within PEL being carved out into a new entity – PPL. Further, PHL Fininvest Limited was merged into PEL; thus, PEL is now a non-banking financial company (NBFC) with PCHFL as its 100% subsidiary.

In the real estate segment, the platform provides housing finance and other financing solutions across the entire capital stack such as structured debt, construction finance, flexi lease rental discounting, etc. PCHFL also offers customised financing solutions to the hospitality sector.

The wholesale business in the non-real estate sector includes separate verticals – Corporate Finance (CFG) and Emerging Corporate Lending (ECL). CFG provides customised funding solutions to companies across sectors such as infrastructure, renewable energy, industrials, auto components, etc, while ECL focuses on providing funds to small and medium enterprises.

PCHFL's Group companies provide customised strategies to institutional and retail investors that include Mumbai Redevelopment Fund and Apartment Fund (through Piramal Fund Management) and strategic partnerships with leading global pension funds such as Canadian Pension Plan Investment Board (CPPIB), APG and Ivanhoe Cambridge.

### Complexity level of the rated instrument

Trust Name	Instrument	Complexity Indicator
<b>Nirvana Trust March 2023</b>	<b>Series A SN</b>	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
