Total	13,531.97	13,166.39	

*Instrument details are provided in Annexure-I

Rationale

ICRA has taken a consolidated view of DLF Cyber City Developers Limited (DCCDL) and its subsidiaries¹ collectively referred to as the consolidated entity or the Group, given the close operational, financial and managerial linkages between the Group entities, shared brand name along with a common treasury team.

The rating action factors in the expected improvement in the Group's net operating income² (NOI) over the medium term, backed by steady ramp-up in occupancy in the existing properties and commencement of rentals from the new properties with healthy pre-leasing. Moreover, the retail leasing segment has surpassed the pre-Covid levels in FY2023. The Group's NOI increased by around 19% in FY2023, and ICRA expects the NOI to grow by ~11-13% year-on-year (YoY) in FY2024. DCCDL, on a standalone basis, proposes to raise Rs. 1,100 crore of NCD, which would be utilised towards refinancing a portion of the existing borrowings. Overall, the Group is likely to maintain consolidated gross debt at around Rs. 20,000 crore in the medium term. Consequently, leverage as measured by net debt³ to NOI is estimated to improve to around 4.5 times by March 2024 (4.7 times as of March 2023).

The Group operates one of the largest commercial real estate portfolios in the country spread across office (35.7 million square feet (msf), 90% of total leasable area) and retail segments (3.9 msf, 10% of total leasable area) in attractive locations as of June 2023. The under-construction portfolio stood at 5.4 msf with an additional development potential of around 25.0 msf, as on the same date. The Group's portfolio is spread across major cities such as Gurugram, Chennai, Kolkata, Hyderabad, Noida and Chandigarh with a reputed and diversified tenant mix comprising leading multi-national and Indian corporates, wherein the top 10 tenants contribute to ~24% of the revenues as of June 2023. The retail assets are situated in prominent micromarkets of the respective cities, thereby enhancing their marketability. The Group has healthy committed occupancy of the completed area at 89% as of June 2023.

¹ Please refer to analytical approach on page 3 and Annexure II on page seven for list of entities consolidated

² Net operating income (NOI) is defined as lease rental income and maintenance income less maintenance, property tax, insurance and any other direct expenses associated with the property

³ Net debt is defined as total external debt minus cash and cash equivalents

The ratings continue to derive comfort from DCCDL's strong parentage, with 66.67% stake held by DLF Limited (DLF) and 33.33% by the Government of Singapore Investment Corporation (GIC). DLF is one of the largest real estate developers in India and has an established track record of successfully developing and leasing commercial as well as retail assets across multiple geographies, while GIC is the sovereign wealth fund of Singapore having a track record of over four decades and strong investment portfolio. The Group enjoys strong financial flexibility on the back of parentage, large portfolio, established relationships with reputed tenants, and lenders.

The ratings, however, remain constrained by the Group's exposure to geographical concentration risks, with 58% of the commercial leasable area being concentrated in Gurugram with high average rentals, resulting in exposure to migration risks of tenants to more competitive micromarkets. The ratings factor in the vulnerability of the portfolio to the lease expiry risk and market risks. The risk is partially mitigated by reputed tenants and lower-than-market rentals. The ratings note the moderate debt coverage metrics and exposure to refinancing risk as a part of the consolidated debt is unamortising in nature. However, the risk is partially mitigated by the comfortable leverage and the Group's strong financial flexibility. The Group has a demonstrated track record of timely refinancing at competitive interest rates in the past. Further, the debt coverage metrics are exposed to interest rate risk. In addition, the cyclical nature of the sector and vulnerability to external developments constrain the ratings. The ratings consider the marketing risks for the under-development projects. Nevertheless, the Group's long and established track record in successfully developing and leasing out office and retail space mitigates the risk. ICRA expects the dependence on incremental debt for capex to be limited, and the capex to be funded through the operational surplus. Nonetheless, higher-than-expected dividends and capex outflows adversely affecting the Group's liquidity will be the key monitorable.

Key rating drivers and their description

Credit strengths

Healthy growth in scale and resultant improvement in leverage levels – The DCCDL Group operates one of the largest commercial real estate portfolios in the country spread across office and retail segments. Its NOI is expected to display healthy growth over the near to medium term, backed by the steady ramp-up in occupancy in the existing properties and commencement of rentals from the new properties with healthy pre-leasing. Moreover, the retail leasing segment has surpassed pre-Covid levels in FY2023. The Group's NOI increased by around 19% in FY2023, and ICRA expects the NOI to grow by ~11-13% YoY in FY2024. DCCDL, on a standalone basis, proposes to raise Rs. 1,100 crore of NCD, which would be utilised towards refinancing a portion of the existing borrowings. Overall, the Group is likely to maintain consolidated gross debt at around Rs. 20,000 crore in the medium term. Consequently, leverage as measured by net debt to NOI is estimated to improve to around 4.5 times by March 2024 (4.7 times as of March 2023).

Diversified lessee profile, supported by favourable location and high quality development – Given the quality and favourable location of the developments, many projects like Cyber City, Cyber Park (Gurugram) and Chennai Special Economic Zone (SEZ) have become associated with major Central Business Districts (CBD) in their respective cities, which contributes to healthy occupancy across various properties. In addition, the tenant profile constitutes marquee names such as Cognizant, IBM, American Express, EY, KPMG, Concentrix, etc, which are present across various sectors, thus mitigating the sectoral concentration risk to an extent.

Strong promoters with established track record – ICRA derives comfort from DCCDL's strong parentage, with 66.67% stake held by DLF and 33.33% by the GIC. DLF is one of the largest real estate developers in India and has an established track record of successfully developing and leasing commercial as well as retail assets across multiple geographies, while GIC is the sovereign wealth fund of Singapore having a track record of over four decades and strong investment portfolio. The Group enjoys strong financial flexibility on the back of its parentage, large portfolio, established relationships with reputed tenants and lenders.

Credit challenges

Exposure to refinancing risk – Part of the consolidated Group debt is unamortising in nature, with bullet repayments at the end of their maturity, thereby exposing it to refinancing risk. However, the risk is partially mitigated by the comfortable leverage and the Group's strong financial flexibility. The Group has a demonstrated track record of timely refinancing at competitive interest rates in the past. Further, higher-than-expected dividends and capex outflows adversely affecting the Group's liquidity will be a key monitorable.

Exposure to geographical concentration and market risks associated with ongoing development – The Group's leasing portfolio of 39.6 msf is spread across seven cities. However, around 58% of the total leasable area is concentrated in Gurgaon, with a high average rental, resulting in exposure to migration risks of tenants to more competitive micromarkets. Moreover, the Group had under-development commercial office projects of 5.4 msf as of June 2023, exposing it to execution and residual market risks. The under-construction assets have healthy pre-leasing of 82% as of June 2023.

Vulnerability of commercial real estate sector to cyclical and external developments – The Group's portfolio is exposed to risks arising from the cyclical in the sector and vulnerability to exogenous shocks such as the Covid-19 pandemic, which could impact the cash flows. Further, the debt coverage metrics are exposed to the interest rate risk.

Liquidity position: Strong

The Group's liquidity position is strong, backed by cash and equivalents of around Rs. 2,045 crore (includes encumbered balances of around Rs. 432 crore) and undrawn credit lines of Rs. 525 crore as on March 31, 2023. Additionally, the likely healthy cash flows from a diversified portfolio are expected to cover its debt obligations, dividends, and capex requirements.

Rating sensitivities

Positive factors – ICRA could upgrade the ratings if the Group is able to successfully achieve a significant ramp-up in occupancy and leasing income from the portfolio (including under-development assets), resulting in substantial improvement in the debt protection metrics, while maintaining a strong liquidity position, on a consistent basis. Specific credit metrics that could lead to a rating upgrade include net debt to NOI reducing to below 4.0 times on a sustained basis.

Negative factors – Negative pressure on the ratings could arise in case of a significant decline in the occupancy or rentals of the completed portfolio impacting the debt protection metrics, or in case of higher-than-expected dividends and capex outflows, which adversely affects the company's liquidity and leverage position. Specific credit metrics that could lead to a downgrade of DCCDL Group's rating include the net debt to NOI increasing above 5.5 times on a sustained basis.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	Corporate Credit Rating Methodology Rating Approach - Lease Rental Discounting (LRD) Rating Approach - Consolidation
Parent/Group support	Not Applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has consolidated the operational and financial profile of DCCDL, and its subsidiaries given the close business, financial and managerial linkages between the Group entities, shared brand name along with a common treasury team.

About the company

DCCDL is involved in the business of developing, setting up and maintaining of commercial offices, retail spaces, technology parks and software parks. In December 2017, GIC, Singapore acquired 33.33% in DCCDL and the balance 66.67% is held by DLF Limited. The company operates one of the largest commercial real estate portfolios in the country spread across 39.6 msf of area at a consolidated level with an occupancy of 89% as of June 2023. The assets are spread across major cities such

as Gurugram, Chennai, Kolkata, Hyderabad, Noida, and Chandigarh. Apart from this, it has 5.4 msf of under-development projects in Chennai and Gurugram as on June 30, 2023.

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
