Salarpuria Properties Private Limited: Rating reaffirmed

Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Fund-based – Term loan	85.00	85.00	[ICRA]A+ (Stable); reaffirmed
Fund-based – Working capital facilities	141.00	141.00	[ICRA]A+ (Stable); reaffirmed
Unallocated	40.87	40.87	[ICRA]A+ (Stable); reaffirmed
Total	266.87	266.87	

*Instrument details are provided in Annexure-I

Rationale

The rating reaffirmation for Salarpuria – Sattva Group ('the Group') factors in the healthy occupancy levels of operational office leasing portfolio, strong sales velocity, collections from the ongoing residential projects and resultant comfortable debt coverage metrics. The occupancy in the office leasing portfolio covering 15.4 million square feet (msf) of area stood at 91% as of March 2023 (compared to 92% as of March 2022 for 13.8 msf of leasable area) with annualised committed rental inflows of Rs. 1300-1350 crore for FY2024. The Group is estimated to complete ~4.5-5.0 msf commercial development during FY2024 (out of ~11 msf under-construction office portfolio) and the rental income is expected to steadily improve going forward with leasing of incremental area. The residential segment witnessed healthy sales and collections, increased by ~72% and ~37% in FY2023, respectively, which is expected to continue in FY2024. While the coverage metrics are expected to remain comfortable due to low debt repayments in the medium term, the leverage levels as measured by adjusted total debt¹/rentals is expected to remain moderate in the range of 6.5-7.5 times during FY2024-FY2025.

The rating draws comfort from the established position of the Group in the real estate market with track record of around four decades with over 70.5 msf of built-up area developed in both commercial and residential segments. Furthermore, comfort is also derived from continued strong financial flexibility of the Group, aided by strong rental income portfolio and availability of undrawn, sanctioned credit limits.

The rating, however, continues to be constrained by the Group's exposure to large expansion plans, and market risk arising from the ongoing and planned capital expenditure in the near-to-medium term. Timely tie-up of leases at adequate rentals for the under-construction office portfolio resulting in timely conversion of construction finance (CF) to lease rental discounting (LRD) loans will remain the key monitorable. The Group remains exposed to execution and market risks for the recently launched residential projects. Nevertheless, the Group's demonstrated track record of development and leasing of commercial real estate assets, healthy sales and collections from the residential portfolio provides comfort. The rating also notes the vulnerability of debt coverage ratios to factors such as changes in interest rate or reduction in occupancy levels. The company is exposed to cyclical associated with the real estate sector and vulnerability to external factors.

The Stable outlook reflects ICRA's expectation that the credit profile of the Group will remain supported by its established track record in the real-estate industry, healthy occupancy, reputed tenant base and healthy debt coverage metrics.

Key rating drivers and their description

Credit strengths

Established track record and brand recognition of the Group in real estate industry; strong financial flexibility - The Salarpuria-Sattva Group has an established position in the real estate market with a track record of around four decades with

¹ Adjusted total Debt includes consolidated debt for Salarpuria Sattva group across all entities including guaranteed debt

over 70.5 msf of built-up area developed in both commercial and residential segments. Further, comfort is derived from the continued strong financial flexibility of the Group, aided by strong rental income portfolio and availability of undrawn, sanctioned credit limits.

Healthy occupancy in the operational assets and strong tenant profile – The occupancy in the office leasing portfolio of 15.4 msf was healthy at 91% as of March 2023 (compared to 92% as of March 2022 for 13.8 msf of leasable area) with annualised committed rental inflows of Rs. 1300-1350 crore for FY2024. The Group is estimated to complete ~4.5-5.0 msf of commercial development during FY2024 (out of ~11 msf under-construction office portfolio) and the rental income is expected to steadily improve going forward with leasing of incremental area. The demand has been steady for most of the properties developed by the Group with a sustained strong tenant profile. The substantial investments in fit outs incurred by tenants and long-term lease tenures reduce the risk of vacancy to an extent. The tenant profile comprises reputed multi-national companies such as Google, JP Morgan Chase, Novartis, Goldman Sachs etc. among others.

Healthy performance of the residential segment - The residential segment witnessed healthy sales and collections, increased by ~72% and ~37% in FY2023, respectively, which is expected to continue in FY2024. The cash flow adequacy ratio (receivables/ (pending cost + debt outstanding)) remained healthy at 64% as of March 2023. Further, low debt levels in the segment provides comfort.

Credit challenges

Exposure to execution and market risk – The Group's exposure to large expansion plans, and market risk arising from the ongoing and planned capital expenditure in the near-to-medium term. Timely tie-up of leases at adequate rentals for the under-construction office portfolio resulting in timely conversion of construction finance to LRD loans will remain key monitorable. The Group also remains exposed to execution and market risks for the recently launched residential projects. Nevertheless, the Group's demonstrated track record of development and leasing of commercial real estate assets, healthy sales and collections from the residential portfolio provides comfort.

Vulnerable to cyclical and changes in interest rates - The Group remains exposed to the inherent cyclical in the real estate industry and vulnerability to external factors. Nonetheless, ICRA takes comfort from the high occupancy in the Group's commercial asset portfolio. The rating notes the vulnerability of debt coverage ratios to factors such as changes in interest rate or reduction in occupancy levels.

Liquidity position: Adequate

The company has adequate liquidity with ~Rs. 220 crore of cash and cash equivalents as of March 2023. The rental receipts are likely to be around Rs. 1,300-1350 crore in FY2024 and is estimated to steadily improve going forward. This along with healthy collections from the residential are expected to be sufficient to meet all the operational and debt servicing requirements of the Group. Further, presence of undrawn LRD debt and available LRD top-up potential in the existing commercial projects provides further liquidity support.

Rating sensitivities

Positive factors – ICRA could upgrade the rating if the Group is able to sustain healthy increase in rentals from the leasing segment and collections from the residential segment along with adequate leasing of the ongoing commercial projects resulting in significant improvement in debt protection metrics and liquidity position on a sustained basis. Specific credit metrics that could lead to upgrade of rating include adjusted total debt to annualized rental income below 5.5 times on a sustained basis.

Negative factors – Negative pressure on the rating could arise in case there is any material decline in occupancy levels in completed office portfolio and/or delay in leasing tie-ups in the ongoing commercial projects and/or significant decline in collections in residential segment or significant increase in indebtedness impacting the leverage and coverage metrics of the Group on a sustained basis. Further, significant outflows towards land investments/support to other related entities adversely

impacting the liquidity position will be credit negative. Specific credit metrics that could lead to a downgrade of rating include adjusted total debt to annualized rental income increasing above 7.5 times on a sustained basis.

Analytical approach

Analytical Approach	Comments

Long-term – Unallocated	NA

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
