Keertana Finserv Private Limited: Provisional [ICRA]A+(SO) assigned to Series A1(a) PTCs and Provisional [ICRA]A-(SO) assigned to Series A1(b) PTCs backed by microfinance loan receivables issued by Mirzam 12 23

Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Mirzam 12 23	Series A1(a) PTCs	25.66	Provisional [ICRA]A+(SO); assigned
	Series A1(b) PTCs	2.85	Provisional [ICRA]A-(SO); assigned

*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

Rationale

ICRA has assigned provisional ratings to the pass-through certificates (PTCs) issued under a securitisation transaction originated by Keertana Finserv Private Limited (Keertana/originator; {[ICRA]BBB(Stable)}/[ICRA]A3+)). The PTCs are backed by a pool of Rs. 32.59-crore (principal amount; receivables of Rs. 40.44 crore) microfinance loan receivables.

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts. Credit enhancement (CE) is available in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal to be provided by SHARE (originator), (ii) principal subordination of 21.25% for Series A1(a) PTC and 12.50% for Series A1(b) PTC of the initial pool principal, and (iii) excess interest spread (EIS) of 13.98% of the initial pool principal for Series A1(a) PTC and Series A1(b) PTC in the structure, as well as the integrity of the legal structure. The provisional ratings are subject to the fulfilment of all the conditions under the structure, due diligence audit of the pool, review by ICRA of the documentation pertaining to the transaction, and the furnishing of a legal opinion on the transaction to ICRA by Keertana.

Key rating drivers

Credit strengths

- Availability of credit enhancement in the form of EIS, over-collateralisation and CC
- None of the contracts in the pool are delinquent as on cut off date and have never been delinquent since origination till cut off date.
- Average seasoning of ~4 months and average pre-securitisation amortisation of ~14% as on the cut-off date

Credit challenges

- High geographical concentration with top state contributing around 84% of the initial pool principal
- Performance of pool would remain exposed to natural calamities that may impact the income generating capability of the borrower, given the marginal borrower profile; further, pool performance would also be exposed to political and communal risks, if any
- Performance of the pool would remain exposed to macro-economic shocks / business disruptions, if any

Description of key rating drivers highlighted above

According to the transaction structure, the loan pool receivables will be assigned at par to the PTC investors. The collections from the pool will be used to make the promised interest payouts (at the predetermined yield and on pari-passu basis to the

holders of Series A1(a) PTCs and Series A1(b) PTCs on the outstanding PTC principal) on each payout date. The final maturity date is September 10, 2025 for Series A1(a) PTCs and September 11, 2025 for Series A1(b) PTCs.

Till June 10, 2025, the collections from the pool, on each payout date, will be used for making the promised interest payouts to the Series A1 PTC investors (i.e. interest at predetermined yield to be paid to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis). After making the promised interest payouts, the collections will be used to make the expected principal payouts to Series A1(a) PTCs till its redemption followed by the expected principal payouts to Series A1(b) PTCs. The entire principal repayment to Series A1(a) PTCs and Series A1(b) PTCs is promised on the scheduled maturity date of the respective tranches.

From June 10, 2025 till the final maturity date, the collections from the pool will be used for making the promised interest payouts to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. After making the promised interest payouts, the collections will be utilised for the expected principal payout i.e., redemption of Series A1(a) and A1(b) PTC on a pari-passu basis. The EIS available after meeting the expected and promised PTC payments will flow back to the originator on a monthly basis.

The first line of support for Series A1(a) PTCs in the transaction is in the form of a principal subordination of 21.25% of the initial pool principal (includes the principal payable to Series A1(b) PTCs and overcollateralisation). After Series A1(a) PTCs has been fully paid, over-collateralisation of 12.50% of the initial pool principal would be available for Series A1(b) PTCs. Further credit support is available in the form of the EIS of 14.94% of the initial pool principal for Series A1(a) PTCs and Series A1(b) PTCs. A CC of 5.00% of the initial pool principal (Rs. 1.63 crore), to be provided by Keertana, would act as further CE in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the trustee will utilise the CC to meet the same.

There are no overdue in the pool as on the cut-off date. The pool has average pre-securitisation amortisation of 13.8% and weighted average seasoning of ~4 months as on the cut-off date. It has high geographical concentration with the top 5 districts account for 56.3% and top state accounting for 84% of the initial pool principal amount. The pool's performance would remain exposed to macro-economic shocks/business disruptions. Given the marginal borrower profile, its performance would also be exposed to natural calamities and political and communal risks, if any.

Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after considering the performance of the originator's portfolio as well as the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 4.25%-5.25% of the initial pool principal, with certain variability around it. The prepayment rate for the underlying pool is estimated at 3.0%-9.0% per annum (with a mean of 6.0%).

Liquidity position

Strong for Series A1(a) PTCs and Series A1(b) PTCs: As per the transaction structure, only the interest amount is promised on a monthly basis to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis while the principal amount is promised on the scheduled maturity date of the transaction. The collections from the pool and the available credit enhancement are expected to be comfortable to meet the promised payouts to the PTC investors.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

Analytical approach

The rating action is based on the analysis of the performance of Keertana’s portfolio till November 2023, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the CE cover available in the transaction.

Analytical Approach	Comments
Applicable rating methodologies	Rating Methodology for Securitisation Transactions
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant’s know your customer (KYC) certificate
6. Any other documents executed for the transaction

Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at www.icra.in.

About the originator

Keertana Finserv Private Limited (Keertana/KFPL) is a non-deposit taking NBFC. It was incorporated in February 1996 as Rajshree Tracom Pvt Ltd and received its NBFC licence in 2001 from the RBI. The company was dormant with no business till the current promoters acquired it at the end of March 2022. Following the approval from the RBI for a change in management and control, the current promoters purchased all the shares of the erstwhile promoters. The company is currently managed by Ms. Padmaja Reddy, the erstwhile Managing Director of Spandana Sphoorthy Financial Limited (SSFL; NBFC-MFI). Keertana acquired its gold loan business from SMBT (Rs. 191 crore) and the MSME business from SRUDO (Rs. 14 crore) as per a business transfer agreement dated April 04, 2022.

Keertana's AUM stood at Rs. 924 crore through 234 branches as of September 2023. Gold loans contributed 46% to the AUM while JLG, LAP and MSME accounted for remaining 60% as of September 2023. Keertana reported a net profit of Rs. 21.4 crore on a managed asset base of Rs. 693.8 crore in FY2023 compared with a net profit of Rs. 0.2 crore on a managed asset base of Rs. 2.8 crore in FY2022.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1(a) PTCs	Moderately Complex
Series A1(b) PTCs	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
