## DMI Finance Private Limited: Provisional [ICRA]AA+(SO) assigned to PTC Series A1 issued by PLUM 24-10, backed by a pool of personal loan receivables

### Summary of rating action

Trust Name	Instrument*	Rated Amount (Rs. crore)	Rating Action
PLUM 24-10	PTC Series A1	48.33	Provisional [ICRA]AA+(SO); Assigned

\*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

### Rationale

ICRA has assigned a provisional rating to PTC Series A1 issued under a securitisation transaction originated by DMI Finance Private Limited (DMI/originator; rated [ICRA]AA(Stable)/[ICRA]A1+). The pass-through certificates (PTCs) are backed by a pool of personal loan (PL) receivables originated by DMI with an aggregate principal outstanding of Rs. 54.92 crore (pool receivables of Rs. 70.02 crore).

The provisional rating is based on the strength of the cash flows from the selected pool of contracts as well as the credit enhancement (CE) available in the form of (i) a cash collateral (CC) of 8.00% of the initial pool principal to be provided by the originator, (ii) principal subordination of 12.00% of the initial pool principal for PTC Series A1, and (iii) the entire excess interest spread (EIS) of 18.61% of the initial pool principal in the structure. The rating is also based on the integrity of the legal structure and is subject to the fulfilment of all the conditions under the structure and the review of the documentation pertaining to the transaction by ICRA.

### Key rating drivers

#### Credit strengths

- Availability of CE in the form of EIS, principal subordination and CC
- No overdue contracts as on pool cut-off date
- High share of salaried borrowers in the pool (~74% of initial pool principal)

#### Credit challenges

- Moderate share of high interest rate contracts with ~39% of contracts in pool having interest rate (IRR) greater than 24%.
- Exposed to inherent credit risk associated with the unsecured nature of the asset class; performance of the pool would remain exposed to macro-economic shocks / business disruptions, if any

### Description of key rating drivers highlighted above

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payment to PTC Series A1 at the predetermined interest rate on the principal outstanding. The entire principal is promised on the final maturity date. During the tenure of PTC Series A1, the collections from the pool, after making the promised interest payouts to PTC Series A1, will be used to make the expected principal payouts to PTC Series A1 (100% of principal billed). However, this principal payout is not promised and any shortfall in making the expected principal payment to PTC Series A1 would be carried forward to the subsequent payout. The EIS, if any, shall flow back to the originator on every payout date after making all the payouts to PTC Series A1 as per the waterfall mechanism.

The first line of support for PTC Series A1 in the transaction is in the form of an equity tranche/principal subordination of 12.00% of the initial pool principal. Additionally, the EIS of 18.61% of the initial pool principal available in the structure provides CE support. A CC of 8.00% of the initial pool principal provided by DMI acts as further CE in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the trustee will utilise the CC to meet the same. The equity tranche PTC payouts are completely subordinated to the PTC Series A1 payouts and the equity tranche payments are not promised at every payout.

There were no overdues in the pool as on the cut-off date. The pool has average seasoning of 9.1 months and pre-assignment amortisation of 21.6% as on the cut-off date. All the contracts in the initial pool had a CIBIL score of at least 700 while 52.8% had a CIBIL score of 750 and above. The pool has a high share of salaried borrowers at ~74%. It also has a moderate share of contracts with higher interest rates – 39% of the contracts have an IRR of more than 24%.

The company has a lower track record of ~4 years in the PL business. While delinquencies in the portfolio have been low, the same has been aided by write-offs. Some of the older vintages in the portfolio were impacted by the Covid-19 pandemic while recoveries from write-offs were lower as expected, given the unsecured nature of the loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class. Also, its performance would remain exposed to macro-economic shocks/business disruptions.

**Past rated pools' performance:** ICRA has ratings outstanding on ten PL PTC transactions of DMI. The live PL pools have shown a healthy cumulative collection efficiency of more than 100% and loss-cum- 90+ days past due (dpd) of sub-4% as of the February 2024 payout.

### Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after taking into account the performance of the originator's portfolio as well as the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 5.75-6.75% of the initial pool principal, with certain variability around it. The prepayment rate for the underlying pool is estimated in the range of 4.8-18.0% per annum.

### Liquidity position: Strong

The liquidity for PTC Series A1 is strong after factoring in the credit enhancement available to meet the promised payouts to the investor. The total credit enhancement would be ~4.75 times the estimated loss in the pool.

### Rating sensitivities

**Positive factors** – The rating could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the CE cover for the remaining payouts.

**Negative factors** – Pressure on the rating could emerge on any sustained weak collection performance of the underlying pool (monthly collection efficiency <90%) leading to higher-than-expected delinquency levels and CE utilisation levels. Weakening in the credit profile of the servicer could also exert pressure on the rating.

## Analytical approach

The rating action is based on the analysis of the performance of DMI’s personal loan portfolio till January 2024, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the CE cover available in the transaction.

Analytical Approach	Comments
Applicable rating methodologies	<a href="#">Rating Methodology for Securitisation Transactions</a>
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into a final rating upon the execution of:

1. Trust Deed
2. Deed of Assignment
3. Cash Collateral Agreement
4. Power of Attorney
5. Information Memorandum
6. All other instruments, deeds and documents executed or entered into by the trustee and/or the seller from time to time, for the purpose of the securitisation of the receivables
7. Legal opinion

## Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the originator

DMI Finance Private Limited (DMI), incorporated in 2008, is a private financial services company registered as a non-banking financial company (NBFC) with the Reserve Bank of India (RBI). While it was mainly engaged in secured corporate lending (largely to real estate builders) till a few years ago, it has shifted its focus to digital lending, wherein it provides consumption loans, personal loans and micro, small and medium enterprise (MSME) loans. This is a completely digital-technology-driven business with API-based origination, underwriting and loan management systems. Herein, DMI predominantly works through front-end partnerships with other fintech companies, original equipment manufacturers and technology-driven aggregators.

On a standalone basis, as on March 31, 2023, consumer loans accounted for 79% (62% as on March 31, 2022) of the Rs. 7,511-crore loan book with the wholesale real estate lending book accounting for a 16% share and the non-real estate wholesale loan book accounting for the balance.

### Complexity level of the rated instrument

Instrument	Complexity Indicator
PTC Series A1	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
