Keertana Finserv Private Limited: Provisional [ICRA]A(SO) assigned to Series A1 SNs backed by microenterprise loan receivables issued by Vikram 06 24

Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Vikram 06 24	Series A1 SNs	47.64	Provisional [ICRA]A(SO); assigned

*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

Rationale

The securitisation notes (SNs) are backed by a pool of micro enterprise loan receivables originated by Keertana Finserv Private Limited {Keertana/Originator; [ICRA]BBB(Stable)} with an aggregate principal outstanding of Rs. 54.44 crore (pool receivables of Rs. 66.35 crore).

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The rating is subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises of the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of Series A1 SNs principal.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 3.00% of the initial pool principal, amounting to Rs. 1.63 crore, to be provided by the Originator, (ii) subordination of 12.50% of the initial pool principal for Series A1 SNs, and (iii) the EIS of 14.29% of the initial pool principal for Series A1 SNs.

Key rating drivers

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 14,021 contracts, with no single borrower exceeding 0.1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the SN payouts.

No overdue contracts in the pool – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent, which is a credit positive.

Seasoned contracts in the pool – The pool has amortised by ~20% as on the cut-off date thereby reflecting the borrowers' better credit profile, repayment track record and buildup of borrower equity.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top state, viz. Andhra Pradesh contributing ~75% to the initial pool principal amount. The concentration remains high even at district-level with top 5 districts accounting for ~44% of the initial pool principal amount. The pool’s performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool’s performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

Key rating assumptions

ICRA’s cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered based on the values observed from the analysis of the past performance of the Originator’s loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA’s cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at ~5.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3.0% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Liquidity position: Strong

The liquidity for Series A1 SNs is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~4.75 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer (Keertana) could also exert pressure on the rating.

Analytical approach

The rating action is based on the analysis of the performance of Keertana’s portfolio till March 2024, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant's know your customer (KYC) certificate
6. Any other documents executed for the transaction

Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at www.icra.in.

About the originator

Keertana Finserv Private Limited (Keertana) is a non-deposit taking non-banking financial company (NBFC). It was incorporated in February 1996 as Rajshree Tracom Pvt Ltd and received its NBFC licence in 2001 from the Reserve Bank of India (RBI). The company was dormant with no business till the current promoters acquired it at the end of March 2022. Following the receipt of RBI approval for a change in management and control, the current promoters purchased all the shares of the erstwhile promoters. The company is currently managed by Ms. Padmaja Reddy, the erstwhile Managing Director of Spandana Sphoorthy Financial Limited (SSFL; NBFC-MFI). Keertana acquired its gold loan business from Spandana Mutual Benefit Trust (SMBT; Rs. 191 crore) and the micro, small and medium enterprise (MSME) business from Spandana Rural and Urban Development Organization (SRUDO; Rs. 14 crore) as per a business transfer agreement dated April 04, 2022.

Keertana's assets under management (AUM) stood at Rs. 1,718 crore through 286 branches as of March 2024. Gold loans contributed 44% to the AUM while joint liability group (JLG), loan against property (LAP) and MSME accounted for the remaining 66% as of March 2024. Keertana reported a provisional net profit of Rs. 72 crore on a managed asset base of Rs. 1,718 crore in FY2024 compared with a net profit of Rs. 16 crore on a managed asset base of Rs. 700 crore in FY2023.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1 SNs	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
