Keertana Finserv Private Limited: Ratings confirmed as final for PTCs backed by micro enterprise loan receivables issued by Canopus 05 2024

Summary of rating action

Trust Name	Instrument*	Rated Amount (Rs. crore)	Rating Action
Canopus 05 2024	Series A1(a) PTCs	32.36	[ICRA]A+(SO); provisional rating confirmed as final
	Series A1(b) PTCs	2.89	[ICRA]A(SO); provisional rating confirmed as final

*Instrument details are provided in Annexure I

Rationale

ICRA had assigned provisional rating of [ICRA]A+(SO) and [ICRA]A(SO) to Series A1(a) PTCs and Series A1(b) PTCs, respectively, issued by the Special Purpose Vehicle (SPV) Canopus 05 2024 in June 2024. The PTCs are backed by a pool of microenterprise loan receivables originated by Keertana Finserv Private Limited {Keertana/[ICRA]BBB(Stable)} with an aggregate principal outstanding of Rs. 41.23 crore (pool receivables of Rs. 50.43 crore). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said ratings have now been confirmed as final.

Pool performance summary:

Parameter	Canopus 05 2024
Months post securitisation	2
Pool amortisation	9.37%
Series A1(a) PTC Amortisation	11.0%
Series A1(b) PTC Amortisation	0.00%
Cumulative Collection Efficiency (including advance collections)	100.1%
Monthly collection efficiency	99.7%
Cumulative Prepayment rate	0.2%
Loss-cum-0+ dpd	0.4%
Loss-cum-30+ dpd	0.1%
Loss-cum-90+ dpd	0.0%
Cumulative cash collateral utilisation	0.0%

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest pay out to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity dates (February 09, 2026 and February 10, 2026 for Series A1(a) PTCs and Series A1(b)PTCs, respectively).

Till September 10, 2025, monthly collections from the pool will be used for making the promised interest payout to Series A1(a)PTCs and Series A1(b) PTCs on a pari-passu basis. After making the promised interest payout, the collections will be used to make the expected principal payouts to PTC Series A1(a) till its redemption, followed by the expected principal payouts to PTC Series A1(b). From September 11, 2025, monthly collections from the pool will be used for making the promised interest payout to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. After making the promised interest

payouts, the collections will be utilised for the redemption of Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the Series A1(a) PTC principal till its redemption and then for the prepayment of the Series A1(b) PTC principal till its redemption.

Credit enhancement is available in the form of (i) a cash collateral (CC) of 3.00% of the initial pool principal provided by the Originator, (ii) subordination of 21.50% of the initial pool principal (including the principal payable to Series A1(b) PTCs, equity tranche and over-collateralisation) for Series A1(a) PTCs and subordination of 14.50% of the initial pool principal for Series A1(b) PTCs (including equity tranche and over-collateralisation), and (iii) excess interest spread (EIS) of 13.69% for Series A1(a) PTCs and Series A1(b) PTC

Key rating drivers

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 9,948 contracts, with no contract exceeding 1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

No overdue contracts in the pool – The pool has been filtered in such a manner that there are no overdue contracts as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent, which is a credit positive.

Seasoned contracts in the pool – The pool has moderate amortisation of ~20% as on the cut-off date thereby reflecting the borrowers' better credit profile, repayment track record and buildup of borrower equity

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top state, viz. Andhra Pradesh contributing ~85% to the initial pool principal amount. The concentration remains high even at district-level with top 5 districts accounting for ~48% of the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered based on the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.0% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3.0% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Details of key counterparties

The key counterparties in the rated transaction is as follows:

Transaction Name	Canopus 05 2024
Originator	Keertana Finserv Private Limited
Servicer	Keertana Finserv Private Limited
Trustee	Catalyst Trusteeship Limited
CC holding bank	ESAF Small Finance Bank
Collection and payout account Bank	ICICI Bank

Liquidity position:

Superior for Series A1(a) PTC

The liquidity for Series A1(a) PTC is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~6.50 times the estimated loss in the pool.

Strong for Series A1(b) PTC

The liquidity for Series A1(a) PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~5.25 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer (Keertana) could also exert pressure on the ratings.

Analytical approach

The rating action is based on the Trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

About the originator

Keertana Finserv Private Limited (Keertana/KFPL) is a non-deposit taking NBFC. It was incorporated in February 1996 as Rajshree Tracom Pvt Ltd and received its NBFC licence in 2001 from the RBI. The company was dormant with no business till the current promoters acquired it at the end of March 2022. Following the approval from the RBI for a change in management and control, the current promoters purchased all the shares of the erstwhile promoters. The company is currently managed by Ms. Padmaja Reddy, the erstwhile Managing Director of Spandana Sphoorthy Financial Limited (SSFL; NBFC-MFI). Keertana acquired its gold loan business from SMBT (Rs. 191 crore) and the MSME business from SRUDO (Rs. 14 crore) as per a business transfer agreement dated April 04, 2022.

Keertana's AUM stood at Rs. 2,238 crores through 300 branches as of June 2024. Gold loans contributed 56% to the AUM while JLG, LAP and MSME accounted for remaining 44% as of June 2024. Keertana reported a provisional net profit of Rs. 31 crores on a managed asset base of Rs. 2,238 crores in Q1FY2025 compared with a net profit of Rs. 72 crore on a managed asset base of Rs. 1,718 crores in FY2024.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1(a) PTC	Moderately Complex
Series A1(b) PTC	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
