Piramal Enterprises Limited: Provisional [ICRA]AAA(SO) assigned to PTCs backed by loan against property receivables issued by Niveda Trust November 2024

Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Niveda Trust November 2024	Series A PTCs	139.48	Provisional [ICRA]AAA(SO); Assigned

*Instrument details are provided in Annexure I

Rating in the absence of the pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

Rationale

The pass-through certificates (PTCs) are backed by a pool of loan against property receivables initially originated by Piramal Capital and Housing Finance Limited {PCHFL; rated [ICRA]AA (Stable)}. The pool of assets, which is being securitised, was earlier acquired by Piramal Enterprises Limited {PEL; rated [ICRA]AA (Stable)} from PCHFL through direct assignment. PCHFL would be the servicer for the PTC transaction. As on the cut-off date, the pool's aggregate principal outstanding was Rs. 139.48 crore (pool receivables of Rs. 290.11 crore).

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure and the integrity of the legal structure. The rating is subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout and principal payout (97.00% of the pool principal billed) to Series A PTCs. The balance principal (3.00%) is expected to be paid on a monthly basis until the maturity of Series A PTC. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will be utilised towards the redemption of Series A PTCs. Any prepayment in the pool would be used for the redemption of Series A PTCs.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 10.00% of the initial pool principal, to be provided by the Originator, (ii) subordination of 3.00% of the initial pool principal for Series A PTCs, and (iii) the EIS of 38.80% of the initial pool principal for Series A PTC.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 434 contracts, with the top 10 contracts forming ~14% of the pool principal, reducing the exposure to any single borrower. The credit enhancement available in the form of subordination, CC and EIS would absorb a part of the losses in the pool and provide support in meeting the Series A PTC payouts.

No overdue contracts in the pool; healthy credit bureau score of borrowers – There were no overdue contracts in the pool as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent, which is a credit positive. In the pool, ~78% of the borrowers (in terms of the principal amount outstanding on the cut-off date) have a CIBIL score of at least 750, which reflects their relatively better credit profile.

Higher share of low LTV contracts – The pool consists of a higher proportion of low loan-to-value (LTV) contracts; ~66% of the contracts have an LTV of 60% or below. The performance of such contracts has remained relatively better in the portfolio. The pool's performance would be dependent on the servicer's ability to limit the slippages of such borrowers.

Contracts backed by mortgage properties – All the contracts in the pool are backed by mortgage properties with ~70% (in terms of the principal amount outstanding on the cut-off date) backed by residential properties. This is expected to support the quality of the pool as it has been observed that borrowers tend to prioritise repayments towards such loans even during financial stress.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top 3 states, viz. Maharashtra, Karnataka, and Telangana, contributing ~53% to the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Exposed to basis risk – The yield for the PTCs is linked to an external benchmark (SBI MCLR) while the interest rate on the underlying loans is floating (linked to PCHFL's benchmark rate), leading to basis risk in the structure.

Risk associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans.

Key rating assumptions

ICRA's cash flow modelling for the rating of securitisation transactions involves the simulation of potential losses, delinquencies and prepayment in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 4.75%. The average prepayment rate for the underlying pool is modelled in the range of 7.20% to 30% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Liquidity position: Superior

The liquidity for the PTC instrument is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be 9 times the estimated loss in the pool.

Rating sensitivities

Positive factors – Not applicable

Negative factors – The rating could be downgraded on the sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency of less than 90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation levels. Weakening in the credit profile of the servicer (PCHFL) could also exert pressure on the rating.

Analytical approach

The rating action is based on the analysis of the performance of PCHFL’s loan against property portfolio till September 2024, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical Approach	
Applicable rating methodologies	Rating Methodology for Securitisation Transactions
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant’s know your customer (KYC) certificate
6. Any other documents executed for the transaction

Validity of the provisional rating

The trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at www.icra.in.

About the originator

Piramal Enterprises Limited (PEL) is a non-banking financial company (NBFC), which was registered with the Reserve Bank of India (RBI) w.e.f. July 22, 2022. It has a presence in retail lending, wholesale lending, and fund-based platforms, primarily through standalone operations and its wholly-owned subsidiary, i.e. Piramal Capital and Housing Finance Limited (PCHFL). As of March 2024, the company’s consolidated operations comprised a network of about 487 conventional branches and 194 microfinance branches across 26 states and Union Territories.

Within retail lending, through its multi-product platform, PEL offers home loans to customers in the affordable housing and budget segments, secured and unsecured lending to small businesses, pre-owned car loans, loan against securities, and unsecured finance constituting microfinance, digital purchase finance, salaried personal loans, etc. Within wholesale lending, it provides financing to real estate developers as well as corporate clients in select sectors.

PCHFL

The erstwhile PCHFL was incorporated in February 2017 as a subsidiary of Piramal Finance Limited and received its housing finance licence from National Housing Bank (NHB) in September 2017. As per a scheme of amalgamation, Piramal Finance Limited and Piramal Capital Limited were merged with the erstwhile PCHFL, w.e.f. March 31, 2018, with PCHFL becoming a direct subsidiary of PEL. Following the merger, the Piramal Group’s financial services business, including real estate lending, housing finance, corporate lending and emerging corporate lending, was housed under PCHFL and PFPL, a fellow subsidiary.

On May 8, 2024, PEL announced that its board of directors (BoD) has approved a composite scheme of arrangement, whereby PEL would be reverse merged with its wholly-owned subsidiary, PCHFL. The merged entity would be renamed Piramal Finance Limited. Further, PCHFL's BoD approved the conversion of the entity to a non-banking financial company – investment and credit company (NBFC-ICC) from a housing finance company (HFC). The reverse merger would take place after PCHFL receives the NBFC-ICC licence.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A PTCs	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
