Shriram Finance Limited: Provisional ratings assigned to PTCs backed by vehicle, construction equipment, and tractor loan receivables issued by Sansar Feb 2025 Trust

Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action
Sansar Feb 2025 Trust	Series A1 PTC	1,889.64	Provisional [ICRA]AA+(SO); assigned
	Series A2 PTC	99.45	Provisional [ICRA]A-(SO); assigned

*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents

No rating would have been assigned as it would not be meaningful

Rationale

The pass-through certificates (PTCs) are backed by a pool of vehicle, construction equipment, and tractor loan receivables originated by Shriram Finance Limited {SFL/Originator; rated [ICRA]AA+ (Stable)} with an aggregate principal outstanding of Rs. 1,989.09 crore (pool receivables of Rs. 2,397.64 crore).

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The ratings are subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

Transaction structure

The transaction has a two-tranche structure, wherein Series A1 PTCs will be equivalent to 95% of the initial pool principal and Series A2 PTCs, equivalent to 5% of the initial pool principal, will be subordinated to Series A1 PTCs.

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout to Series A1 PTCs. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) firstly to Series A1 PTCs and then to Series A2 PTCs (after Series A1 PTCs are fully paid off). Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the Series A1 PTC principal (and to Series A2 PTCs after Series A1 PTCs are fully paid off).

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 3.50% of the initial pool principal, amounting to Rs. 69.62 crore, provided by the Originator, (ii) subordination of 5.00% of the initial pool principal for Series A1 PTCs, and (iii) the EIS of 9.32% of the initial pool principal for Series A1 and Series A2 PTCs.

Key rating drivers and their description

Credit strengths

Adequate servicing capability of originator – SFL, which is also servicing the loans in the transaction, has an established track record of more than four decades in the preowned commercial vehicle financing business with adequate underwriting policies and collection procedures across a wide geography. It also has satisfactory processes for servicing the loan accounts in the securitised pool.

Granular pool supported by the presence of credit enhancement – The pool was granular as on the cut-off date, comprising 68,590 contracts with the top 10 contracts forming only 0.2% of the initial pool principal, thereby reducing the exposure to

any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb a part of the losses in the pool and provide support in meeting the PTC payouts.

Seasoned contracts in the pool – The pool had amortised by ~30% with seasoning of ~18 months as on the cut-off date, reflecting the borrowers' relatively better credit profile and repayment track record.

Credit challenges

Presence of long-tenure contracts – On the cut-off date, ~47% of the contracts in the pool had an original tenure of more than 48 months. The performance of such contracts has remained relatively weaker in the portfolio. Thus, the pool's performance would be dependent on the company's ability to limit slippages from such borrowers.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 3.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

Liquidity position

For Series A1 PTC: Strong

The liquidity position for Series A1 PTC is strong after factoring in the credit enhancement available for meeting the promised payouts to the investor. The total credit enhancement would be 4.5 times the estimated loss in the pool.

For Series A2 PTC: Adequate

The liquidity position for Series A2 PTC is adequate after factoring in the credit enhancement available for meeting the promised payouts to the investor. The total credit enhancement would be 2.75 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer (SFL) could also exert pressure on the ratings.

Analytical approach

The rating action is based on the analysis of the performance of SFL’s portfolio till September 2024, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical approach	Comments
Applicable rating methodologies	Rating Methodology for Securitisation Transactions
Parent/Group support	Not applicable
Consolidation/Standalone	Not applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned ratings are provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee compliance letter
5. Chartered Accountant’s know your customer (KYC) certificate
6. Any other documents executed for the transaction

Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at www.icra.in.

About the originator

Shriram Finance Limited [SFL; erstwhile Shriram Transport Finance Company Limited (STFC)], incorporated in 1979, is a part of the Shriram Group of companies and an upper layer non-banking financial company. Based on the National Company Law Tribunal order dated November 14, 2022, the operations of Shriram City Union Finance Limited (SCUF) and Shriram Capital Limited (SCL) were merged with STFC, which was rechristened Shriram Finance Limited on November 30, 2022.

SFL enjoys a leadership position in preowned commercial vehicle finance and has a pan-India presence with more than 3,800 branches and other offices. As on December 31, 2024, its assets under management (standalone) stood at Rs. 2.54 lakh crore comprising commercial vehicle finance (46%), passenger vehicle finance (20%), small and medium-sized enterprise (SME) lending (14%), construction equipment and farm equipment finance (9%), two-wheeler loans (6%), personal loans (3%), and gold loans (2%).

Key financial indicators

SFL – Standalone	FY2023*	FY2024^	9M FY2025^
	Audited	Audited	Limited review
Total income	29,803	34,998	30,399

Complexity level of the rated instrument

Instrument	Complexity indicator
Series A1 PTC	Moderately Complex
Series A2 PTC	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
