<b>Total</b>	<b>7,05,663.37</b>	<b>8,67,283.27</b>	

\*Instrument details are provided in Annexure I; <sup>#</sup>Includes commercial paper of up to Rs. 10,000 crore for FY2025 and Rs. 5,000 crore for FY2026

### Rationale

While arriving at the ratings, ICRA has taken a consolidated view of the credit profiles of REC Ltd. (REC) and Power Finance Corporation Ltd. (PFC) as REC is a subsidiary of PFC (collectively referred to as the Group) and the entities are in a similar line of business with strategic importance to the Government of India (GoI) and common clientele.

The ratings continue to draw significant strength from PFC group's sovereign ownership<sup>1</sup>, its importance to the GoI, given its role as a nodal agency for various power sector schemes, and the Group's dominant market position in the power sector financing segment with an aggregate loan book of Rs. 10.7 lakh crore as on December 31, 2024. The ratings continue to factor in the diversified borrowing mix, good financial flexibility by virtue of the ownership, adequate liquidity and the established track record of healthy profitability. These strengths are partly offset by the moderate capitalisation with a consolidated gearing of 6.0x as on December 31, 2024.

The Group remains vulnerable to the risks arising from its exposure to a single sector (i.e. power) with high concentration towards the relatively weak state power utilities as well as the vulnerability of its exposure to private sector borrowers. However, the asset quality indicators have shown an improving trend as the gross stage 3 assets stood at 2.0% and 2.3% of the total advances at the standalone and consolidated level, respectively, as on December 31, 2024, supported by negligible fresh slippages over the last three years, resolution of a few stressed accounts and loan book growth. The Group reported a consolidated return on managed assets (RoMA) of 2.6% in 9M FY2025 (2.7% in FY2024), supported by adequate margins, low operating costs and controlled credit costs.

<sup>1</sup> 56% held by GoI in PFC and PFC held 53% stake in REC as on December 31, 2024

ICRA believes that prudent capitalisation is a key mitigant against the risks arising from sectoral and credit concentration. In this context, cognisance has been taken of the various Government schemes with REC and PFC as lending partners. The impact on the capitalisation ratios has been cushioned by the lower risk weight applicable to the exposures, backed by state government guarantees. ICRA believes that REC and PFC remain important vehicles for the implementation of the GoI's various power sector schemes. Hence, support will be forthcoming from the GoI if needed. Support to REC, if required, will be extended by the GoI through PFC.

The Stable outlook reflects ICRA's expectation that REC and PFC will likely remain strategically important to the GoI and will continue to play a major role in various power sector schemes of the Government. Consequently, REC and PFC are likely to retain a dominant position in power sector financing while maintaining adequate profitability, borrowing and capitalisation profiles.

ICRA has reaffirmed and withdrawn the ratings for the Rs. 29,380.10-crore long-term borrowing programme with no amount outstanding against the rated instruments. The ratings have been withdrawn as per ICRA's policy on the withdrawal of credit ratings.

## Key rating drivers and their description

### Credit strengths

**Sovereign ownership and strategically important to GoI; dominant position in power sector financing** – As a nodal agency for implementing various GoI schemes aimed at developing the country's power sector (such as Revamped Distribution Sector Scheme (RDSS), Sahaj Bijli Har Ghar Yojana (Saubhagya), Deendayal Upadhyaya Gram Jyoti Yojana (DDUGJY), PM Suryodaya Scheme), REC remains strategically important to the GoI for achieving its objective of augmenting the power capacity across the country. It has maintained a dominant position in power sector financing with a large share of funding to state power utilities. REC is committed towards maintaining the current market share in the infrastructure financing segment.

**Good financial flexibility and resource profile** – The Group enjoys good financial flexibility, given its sovereign ownership, which augurs well for raising long-term funds from both domestic and international financial institutions (FIs) at competitive rates. REC has been able to raise funds at competitive rates. In the past, it had received approval from the GoI to raise tax-free and 54EC low-cost capital gain bonds, which provide comfort with respect to its financial flexibility and importance to the GoI, its ability to raise low-cost funds and maintain a diversified borrowing profile. The funding mix remains adequately diversified and includes long-term market instruments, foreign currency borrowings, banks and FIs. While REC is exposed to risks arising from fluctuations in foreign exchange rates, given the sizeable foreign currency denominated borrowings, it has been actively focused on hedging these borrowings. The risk is mitigated through hedging of almost entire foreign exchange borrowings (on a standalone basis), with a residual maturity of up to 5 years as on December 31, 2024.

**Established track record of healthy profitability** – On a consolidated basis, the yields and cost of funds have remained broadly stable during the year. Nonetheless, the net interest margin (NIM) increased slightly to 3.4% in 9M FY2025 from 3.3% in FY2024. Further, nil slippages in the loan accounts and the reversal of the provision on recoveries from the existing stressed assets resulted in negligible credit costs in 9M FY2025 on a consolidated basis. At the same time, operating expenses remained low at 0.1% in 9M FY2025, given the wholesale nature of the business. The consolidated profitability profile remains healthy with a net profit of Rs. 22,157 crore in 9M FY2025 and Rs. 26,461 crore in FY2024, translating into RoMA of 2.6% in 9M FY2025 compared with 2.7% in FY2024. The overall profitability indicators are expected to remain stable going forward as well, supported by business growth and controlled credit costs while margins could face some pressure.

On a standalone basis for REC, stable NIMs, low operating expenses and controlled credit costs resulted in a net profit of Rs. 11,477 crore in 9M FY2025 compared with Rs. 14,019 crore in FY2024. This translated into RoMA of 2.6% in 9M FY2025 compared with 2.7% in FY2024, better than REC's 3-year (FY2022-FY2024) average RoMA of 2.5%.

## Credit challenges

**High concentration risk and portfolio vulnerability** – The Group’s exposure to a single sector (i.e. power), large-ticket loans, the high concentration of exposure towards financially weak state power utilities and the vulnerability of its exposure to private sector borrowers increase the portfolio vulnerability. Both REC and PFC modified their Memorandums of Association (MoAs) in FY2023 to be able to lend to other infrastructure projects as well. As for concentration risk, both PFC and REC are within the concentration limits prescribed by the Reserve Bank of India (RBI). Concentration risk has been declining for REC over the past few years with the top 10 advances accounting for ~36% of the total advances as on December 31, 2024 compared with 40% as on March 31, 2024.

The Group’s asset quality indicators have been improving with the gross stage 3 assets declining to 2.0% and 2.3% of the total advances at the standalone and consolidated levels, respectively, as on December 31, 2024 from 2.7% and 3.0%, respectively, as on March 31, 2024, following the resolution of large, stressed accounts in 9M FY2025. With a provision cover of ~62% and 68%, respectively, the net stage 3 assets stood at 0.7% of the total advances at the standalone as well as the consolidated level as on December 31, 2024. As on December 31, 2024, 13 of the 14 projects under REC’s stressed category, worth Rs. 9,543 crore are being resolved under the National Company Law Tribunal (NCLT) while one project, worth Rs. 1,503 crore is being resolved outside the NCLT. On a consolidated and standalone basis, the entire portion of the credit-impaired assets was from the private sector book as on December 31, 2024, for which the company has made sizeable provisions. Going forward, the Group’s ability to grow its loan book, while controlling the credit costs and maintaining the profitability, would be imperative.

**Moderate capitalisation** – PFC’s acquisition of REC had impacted the Group’s consolidated capitalisation. While considerable recovery has been witnessed since then, the leverage remains moderate with a consolidated gearing of 6.0x as on December 31, 2024. Comparatively, REC’s capitalisation at the standalone level was characterised by a gearing of 6.5x and a capital-to-risk weighted assets ratio (CRAR) of 25.3% as on December 31, 2024. ICRA believes that prudent capitalisation is a key mitigant against the risks arising out of sectoral and credit concentration. In this context, cognisance has been taken of the various Government schemes with REC and PFC as lending partners. The capitalisation ratios are cushioned by the lower risk weight applicable to the exposures backed by state government guarantees (~50% of total portfolio).

## Environmental and social risks

Given the service-oriented nature of its business, the Group does not face material physical climate risks but is exposed to environmental risks indirectly through its portfolio of assets. However, if the entities or businesses, to which these companies have an exposure, face business disruptions because of physical climate adversities or if such businesses face climate transition risks because of technological, regulatory or customer behaviour changes, the same could translate into credit risks for the companies involved. Such risk is, nevertheless, mitigated by adequate portfolio diversification. With regard to social risks, data security and customer privacy are among the key sources of vulnerability for lending institutions as material lapses could be detrimental to their reputation and invite regulatory censure. Given the nature of their business, REC and PFC's exposure to social risks is limited.

## Liquidity position: Adequate

As on December 31, 2024, REC’s asset-liability maturity (ALM) profile, on a standalone basis, reflected debt maturities (including interest) of ~Rs. 114,100 crore for the 12-month period ending December 31, 2025, against which its scheduled inflows from advances are expected at ~Rs. 149,738 crore. The company’s ALM profile is characterised by positive cumulative mismatches in all buckets. Liquidity profile is further augmented by high liquid assets and unutilised bank lines. Further, the healthy financial flexibility, supported by the sovereign ownership and the ability to raise funds at short notice, provides comfort.

## Rating sensitivities

**Positive factors** – Not applicable

**Negative factors** – ICRA could change the rating outlook to Negative or downgrade the ratings on a change in ownership and/or a change in REC's strategic role or importance to the GoI. The ratings would also be revised if there is any change in the credit profile of REC's parent i.e. PFC. A deterioration in the consolidated solvency (Net stage 3/net worth), to a level above 40% on a sustained basis, will be a negative for the credit profile.

## Analytical approach

Analytical Approach	Comments
<b>Applicable rating methodologies</b>	<a href="#">ICRA's Credit Rating Methodology for Non-banking Finance Companies</a> <a href="#">Policy on Withdrawal of Credit Ratings</a>
<b>Parent/Group support</b>	While arriving at the ratings, ICRA has taken a consolidated view of the credit profiles of PFC and REC as REC is a subsidiary of PFC and both entities are in a similar line of business with strategic importance to the GoI and common clientele. The ratings derive strength from the strategic importance of PFC and REC to the GoI, their role as nodal agencies for various power sector schemes of the Government, and likely support from the GoI, if required. The GoI ownership supports the financial flexibility of PFC and REC.
<b>Consolidation/Standalone</b>	Consolidation

## About company

REC Limited, incorporated in 1969, is a non-banking financial company (NBFC) with infrastructure finance company status. It is majority owned by Power Finance Corporation Ltd. (53% as of December 31, 2024), which, in turn, is majority owned by the Government of India (56% as of December 31, 2024). REC's main objective is to finance and promote power sector projects across the country. While the initial mandate was to finance village electrification, pump-set energising and transmission and distribution projects, the mandate was subsequently extended to cover IPPs and power generation projects larger than 25 MW and other infrastructure projects. REC provides loans to various state power utilities, private sector project developers, Central power sector utilities and state governments for investment in power generation, transmission, distribution, other infrastructure segment and other system improvement schemes/initiatives.

On a standalone basis, REC reported a PAT of Rs. 11,477 crore during 9M FY2025 against a PAT of Rs. 10,003 crore during 9M FY2024. As of December 31, 2024, its reported capital adequacy was 25.3% and it had a total loan book of Rs. 565,621 crore (Rs. 509,371 crore as of March 31, 2024).

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Long-term borrowing programme	Simple
Short-term borrowing programme	Simple
GoI fully serviced bonds	Simple
Long-term/Short-term fund-based/Non-fund based limits	Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

## ABOUT ICRA LIMITED:

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website [www.icra.in](http://www.icra.in) or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
